2G/3G/Wi-Fi	**Fingerprint patrol**	**Item Record**	**Keyboard**	**Durable USB Port**

Work method:

Patrol duty person carry FG-1 patrol device to do patrol work, before starting work, the duty person touch his fingerprint to login as current person, Then walk following the scheduled patrol route. Once duty person arrived to the patrol area and finish patrol inspection, use device to scan RFID checkpoint with 3-5 cm as clock in and can also record inspection notes (User can set fingerprint authorization in software to ask fingerprint verification for checkpoint, if clock in person is not the same one as scheduled, software will show"imposter"). Device will store patrol data automatically and send out to management software in real time via GPRS, meanwhile, software manager can process patrol data synchronously and query report.

Technical Parameters

Read card type	125kHz EM ID card
Storage capacity	10,000 pcs patrol data
Max Fingerprint	300pcs
Item for each spot	15pcs
Max Value	0.0001-10million
Logical option per item	5pcs
Max Units	250pcs
Card reading time	<0.1S
Display	TFT 2.4'240*320 Color Screen
Communication baud rate	115200
Data transfer	Automatically
Communication	USB/GPRS
operation temperature	-40 ~+70°C
Size	170*75*40mm
Power supply	60mA
Structure	ABS+PC+rubber coating
Net weight	270g
Battery	1350mAh rechargeable li-ion battery
