❻ Clip　　❼ Magnetic Pogo Pin USB port

Benefits

RFID Reading
Z-6700 is a RFID reader that uses low frequency to wirelessly read data at checkpoint. Checkpoint is the passive tags that use more than 20 years no need power supplied.

4G Real-time
Real-time data is delivered immediately after collection. There is no delay in the timeliness of the information provided, which can be improved work efficiency, reduced errors and lower costs

SOS Alert
Panic button exist is to protect people and property from harm. They can provide an instant alert to the monitoring company when the user feels they are in danger and need immediate emergency assistance.
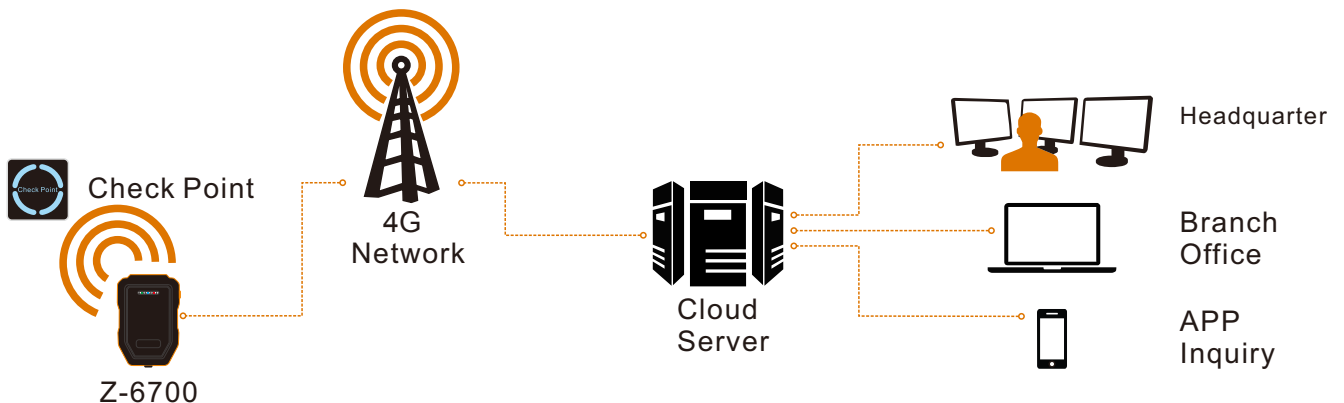

Mini Size
A mini size that fits in an adult's hand, no more heavy sense even if hanging on the neck or clipping on the belt, still keeping comfortable experience.
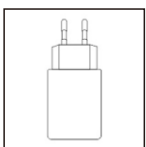

Technical Parameters
