

INTERNET COMMUNICATION STATION SOLUTION

PROFESSIONAL MANUFACTURER SINCE 2006

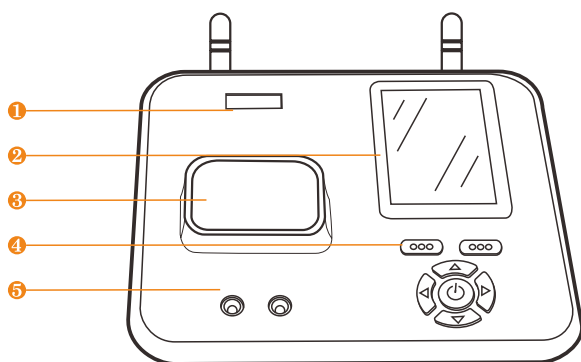

Key Features

- Collect reader's data to server in real time by WiFi, ethernet and GPRS network
- Quick charge for patrol readers
- Auto-sync time with server
- 2.4 inch colorful display
- 10 million logs mass storage
- Data can be stored over 30 years without power

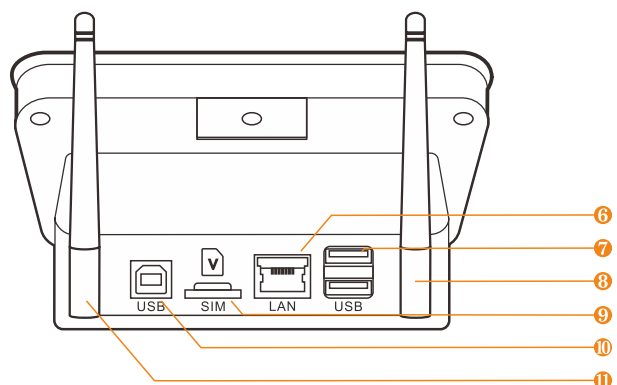

ZOOY Z-9200 is an Internet communication station that sends offline patrol wand's data to the server in real time through Wi-Fi, GPRS and Ethernet. It mainly solves the problem that the security guard far away from the headquarters to complete data transmission without computers or software. In the meanwhile, Z-9200 is shareable with all of ZOOY offline patrol wands, not only greatly improves the patrol efficiency and also reduce the cost of employee and facility. Z-9200 also has the function of quick patrol wands charging.
